DECLARATION OF ROBERT W. CRANDALL, MBA

I. ASSIGNMENT

5 1. I have been retained by counsel to the defendants Nursing Home Care
6 Management Inc, and Alex Dorfman (collectively, “Prestige”) to conduct an audit of time and pay
7 records to: 1) evaluate the Department of Labor’s allegations that Prestige employees have been
8 unpaid wages and overtime; 2) estimate the amount of potential unpaid wages and overtime owed
9 under different theories for what time may be compensable; and 3) respond and critique the audit
10 performed by the DOL’s investigators.

II. QUALIFICATIONS

13 2. I am a Partner at Resolution Economics LLC, a firm whose activities include
14 conducting labor studies, performing economic and statistical analyses, and providing complex
15 data analysis in connection with litigation and non-litigation issues. I have been retained in an
16 expert or consulting capacity in more than 500 class or collective action matters alleging wage
17 and hour violations under the Fair Labor Standards Act (“FLSA”) and various state laws. In
18 connection with this work, I have been involved in hundreds of projects where the objective was
19 collecting and analyzing data related to the work activities of class members through the use of
20 scientific surveys, time and motion observation studies, and other forensic data studies. I have
21 also been asked to perform similar studies in connection with conducting wage and hour audits. I
22 have significant experience in examining work activity data in multiple industries including: retail,
23 restaurant, hospitality, manufacturing, healthcare, and various types of mobile workers including
24 jobs involving technicians/repairers and installers, and transportation and warehousing workers.
25 In connection with these assignments, I am often asked to study the available data and forensically
26 reconstruct the subject’s workday through various methodologies including: forensic data studies,
27 scientific surveys, and observation studies. In addition, I am frequently asked to review and
28 comment upon the surveys and studies conducted by other experts. I also am highly experienced

1 in devising scientific studies to collect video and in-person observation studies to collect data and
 2 information related to the frequency and duration of various events in the workplace and my work
 3 has often called for analysis of survey data in the context of labor economics issues. Finally, I hold
 4 an M.B.A. from Loyola Marymount University, and a B.A. degree in History from the University
 5 of Southern California. I have been qualified as an expert witness in both Federal and State Courts.
 6 My resume is attached to this report as Attachment A. My hourly rate is \$800 per hour, which is
 7 the rate I customarily charge for both consulting work and expert testimony.

8

9 **III. DISCUSSION OF AVAILABLE DATA**

10 **a. Timekeeping data**

11 3. I received timekeeping data in an electronic Excel format. The data spans
 12 November 2015 through May 2022 and contains records for each individual employees' day. The
 13 records detail which patient each employee visited, the time that said visit occurred, and the
 14 address of that patient. Throughout the complete time-period, there are 2,295 unique employees
 15 across 1,499,558 workdays from 11/9/2015 to 5/27/2022 with approximately 892,215 individual
 16 trips from one patient to another during the workday.¹ The available data shows when and where
 17 every appointment occurred, the duration of time between appointments, whether any employee
 18 traveled between appointments, and by bringing in Google Maps, an accurate estimate how much
 19 travel time occurred. Thus, no sampling or averaging is needed because Prestige keeps and has
 20 produced all the records necessary to assess potential uncompensated time for each workday for
 21 all employees from 11/9/2015 to 5/27/2022.

22 **b. Payroll data**

23 4. Payroll data was provided by pay period in Excel format. There were 86
 24 Excel files containing pay records for 2,286 employees from the pay periods ending between
 25 October 29, 2015, and May 5, 2022. The pay records include information related to the hours and

27 ¹ 0.50% of calendar days and 3 employees are excluded from the time data for having missing, negative or
 28 overlapping time punches. There are 19 employees who have more than one EmpID in the time data, and two
 employees who share a single EmpID. Trips here is defined as any gap in work time (time between visits). The raw
 time data (and the DOL's analysis) spans from 11/1/2015 to 5/31/2022. The 12 days outside of the relevant period
 are excluded are excluded from the workday analyses below.

1 earnings recorded for each employee pay period. From the pay data, one can assess the hourly
 2 rates of employees during the audit period.²

3

4 **IV. INTRODUCTION**

5. It is my understanding that the Department of Labor (“DOL”) contends that
 6 Prestige failed to pay its employees for all time worked. More specifically, the DOL alleges that
 7 Prestige sometimes did not pay for “non-working time” between appointments at the same
 8 location and travel time between appointments on the same day.³ It is my understanding that the
 9 parties are operating under different legal theories of what constitutes compensable time. For the
 10 purposes of this audit, the factors below will address the economic consequences of the various
 11 theories of what may constitute compensable time and the corresponding estimate of unpaid
 12 wages.

13

14. Since the audit commenced, the DOL has changed their calculation
 15 methodology. This change significantly reduced the DOL’s estimate of potential unpaid wages.
 16 Indeed, the DOL’s current estimate for the November 9, 2015 to May 27, 2022 period is less than
 17 half of the previous estimate for the November 9, 2015 through November 5, 2018 period alone.
 18 While I agree that the DOL’s estimate is becoming more accurate as it is based upon Prestige’s
 19 thorough and detailed records, there are still flaws in the DOL’s approach which result in inflated
 20 estimates of unpaid wages. In other words, while the assumptions are more reasonable now that
 21 the DOL has the address data for appointments, the decision to use assumptions for travel time
 22 instead of actual estimates of travel time between appointments results in inflated estimates. In
 23 addition, the DOL’s analysis includes time that Prestige contends is not compensable. Finally, the
 24 DOL’s analysis does not consider that non-working time should be paid at minimum wage, which
 25 correspondingly means that overtime should be paid out at the weighted average regular rate
 26 versus time and a half at \$11 per hour for all employees. Therefore, the estimates below are

28 ² A comparison of hours in timekeeping and hours in payroll revealed that the pay periods provided in the raw
 payroll data are shifted forward by 14 days. These are adjusted accordingly throughout the following analyses.

³ It is my understanding that Prestige is not compensated by Medicare for non-working time.

1 calculated under different potential theories thereby presenting alternatives for the trier of fact to
 2 determine which theory is most appropriate for measuring unpaid time, if any.

3 7. It is important to note that Home Health Aides (“HHA’s”) were scheduled
 4 to see only one patient per day on 51% days. This is significant because days with one patient
 5 cannot have any non-working “gap time” or travel time between appointments. For days with
 6 more than one patient appointment, the fact patterns are often dissimilar in terms of: 1) whether
 7 there is gap time or the appointments are back-to-back; 2) the duration of non-working gap time
 8 between appointments when it occurs; 3) whether travel was involved between appointments; 4)
 9 the duration of non-working travel time between appointments; 5) whether the estimated non-
 10 working time may fall under a threshold the Court determines for *de minimis*; 6) whether travel
 11 time between appointments scheduled far apart during the workday is compensable, 7) whether
 12 the employee was paid minimum wage for all hours worked; 8) whether non-working travel and
 13 gap time should be paid at minimum wage; and, 9) whether the regular rate for overtime purposes
 14 should be calculated as a weighted average of minimum wage and base rate versus base rate alone.

16 8. The DOL’s methodology is based on estimating potentially unpaid wages
 17 on a sampling basis. However, with Prestige’s records, one can identify each instance when there
 18 is non-working gap time between appointments, whether travel occurred, and accurately estimate
 19 associated travel time through interfacing with Google Maps.⁴ In addition, Prestige’s records
 20 allow one to determine how many hours the HHA worked, was paid for, and what rate on a shift-
 21 by-shift, pay-period by pay-period basis. In contrast to the DOL’s approach, the analyses
 22 presented herein are based on analyzing every day and every trip for every employee during the
 23 audit period. In other words, there is no need to use sampling or averaging because the records
 24 are complete for the purposes of addressing the claims at issue.

26
 27 4 On approximately 17% of the unique routes studied, the Google Maps algorithm returned a walking route as the
 28 best route. For these routes, the mileage returned by Google Maps was used instead to estimate drive time. To
 calculate the driving time, the mileage was divided by the average of miles per hour of 22.1, derived from the
 remaining 83% of routes.

1 9. Before discussing areas of disagreement, it is important to note areas of
 2 agreement between the analyses. Both the DOL's and ResEcon's analyses assume that gap time
 3 that is greater than 20 minutes is not compensable. The disagreements between the calculations
 4 are primarily due to the DOL taking analytical short-cuts as opposed to analyzing the full data.
 5 For example, the DOL takes other analytical short cuts in deriving its estimate of unpaid wages.
 6 Notably, the DOL's methodology assigns 15 minutes for every travel segment regardless of how
 7 long the travel segment took. Indeed, the DOL's back-up documentation shows how Investigator
 8 Jamail-Gutierrez derived his travel time estimate. First, the DOL selected a sample of 3,133 travel
 9 segments between appointments which were ran through the Google Maps algorithm. From this
 10 exercise, the DOL derived an average travel time estimate of 10.73 minutes when it occurs (and a
 11 median travel estimate of 9 minutes). The DOL then adds time for "traffic", "departure walk to
 12 car," and "arrival walk to client" to round up to 15 minutes.⁵ The obvious problem with this
 13 assumptions-based approach is that it assumes that HHA's are staying until their exact end time
 14 for each appointment and do not perform any of these activities during the scheduled time. In
 15 short, the DOL's assumption of 15 minutes per travel lacks scientific basis and directly contradicts
 16 the actual results from the travel analysis the DOL performed on the sample of routes the DOL
 17 chose to analyze.⁶ In addition, to the DOL's median estimate for travel time is approximately 9
 18 minutes, which may constitute *de minimis* time if that is the only travel of the day.

19 10. The DOL also took a shortcut by deciding to use a flat rate of \$11 per hour
 20 for all HHA's in their calculations. This shortcut avoided using each individual HHA's actual base
 21 rate in Prestige's payroll data on a pay period-by-pay period basis and ignores the option that
 22 Prestige may pay non-working travel and gap time at minimum wage. While this calculation can
 23 be performed using the available records, the DOL's shortcut results in over-estimating potential
 24 unpaid regular wages and overtime. Finally, it is my understanding that the DOL may be entitled

26 ⁵ Note that the traffic time estimate is based off an even smaller subset of 323 trips, approximately 1.97% of all
 27 unique routes recorded in the data. See spreadsheet "DOL 185229 Actual Travel Time Analysis.xlsx – sheet
 'Sheet2'".

28 ⁶ The DOL calculates 15,672 unique routes, presumably limiting the count to routes that occur during the calendar
 day. If one were to properly account for overnight shifts, the correct count of unique routes that occur during a work
 day is 16,320. See spreadsheet "DOL 185229 Actual Travel Time Analysis.xlsx – sheet "STATS".

1 to only recover unpaid overtime, but the DOL's unpaid wages estimate includes both straight time
 2 and overtime earnings.

3

4

V. DATA ANALYSIS

5

A. The timekeeping data shows that over half of the workdays studied have 6 zero non-working time because there is only one patient appointment

7

11. Exhibit 1 below presents analysis of the number of appointments per day.⁷
 12 Across the 1,499,558 workdays for the 2,295 HHAs studied, 51.0% of days involved only one
 13 patient, which implies there cannot be any non-working gap time or travel time between patients
 14 on more than half of the days studied. Further, 28.1% of days have 2 appointments and 11.5% of
 15 days have 3 appointments. Thus, 79.1% of days have 2 or fewer appointments and 90.6% of days
 16 have 3 or fewer appointments.

17

18

19

20

21

22

23

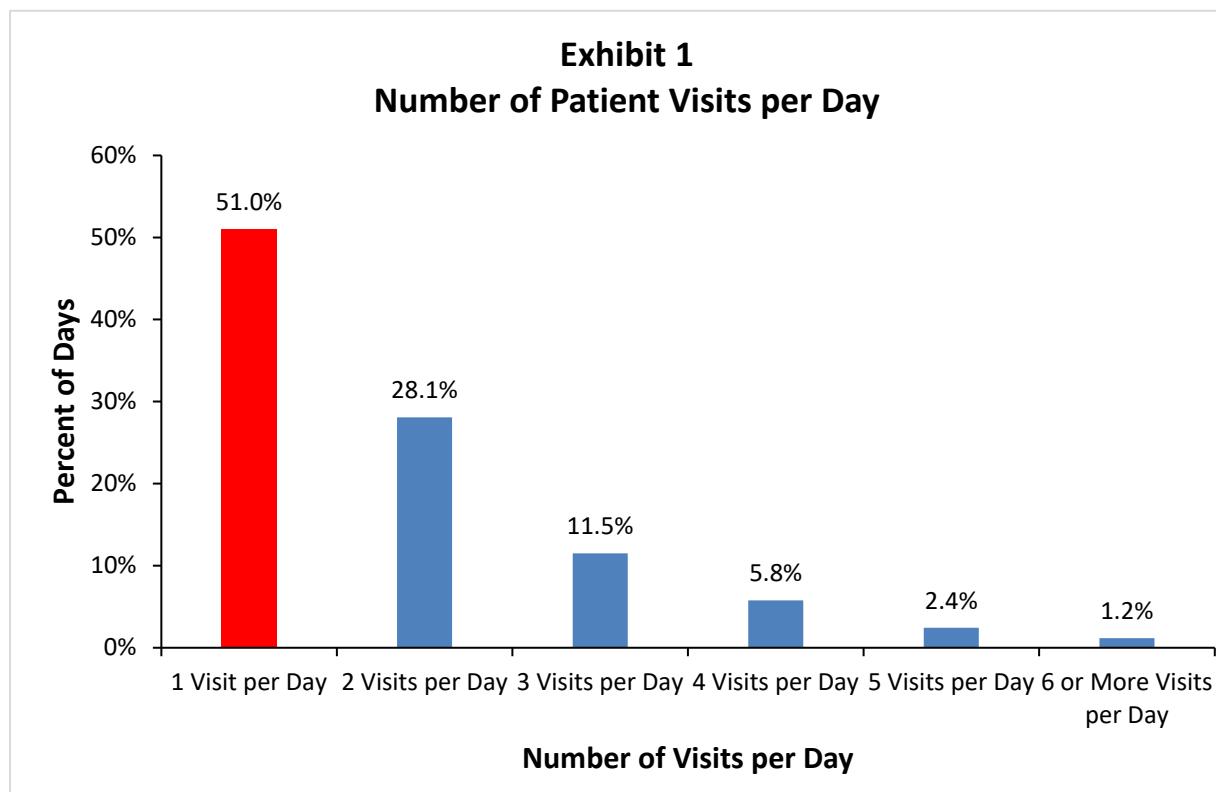

24

25

26

27

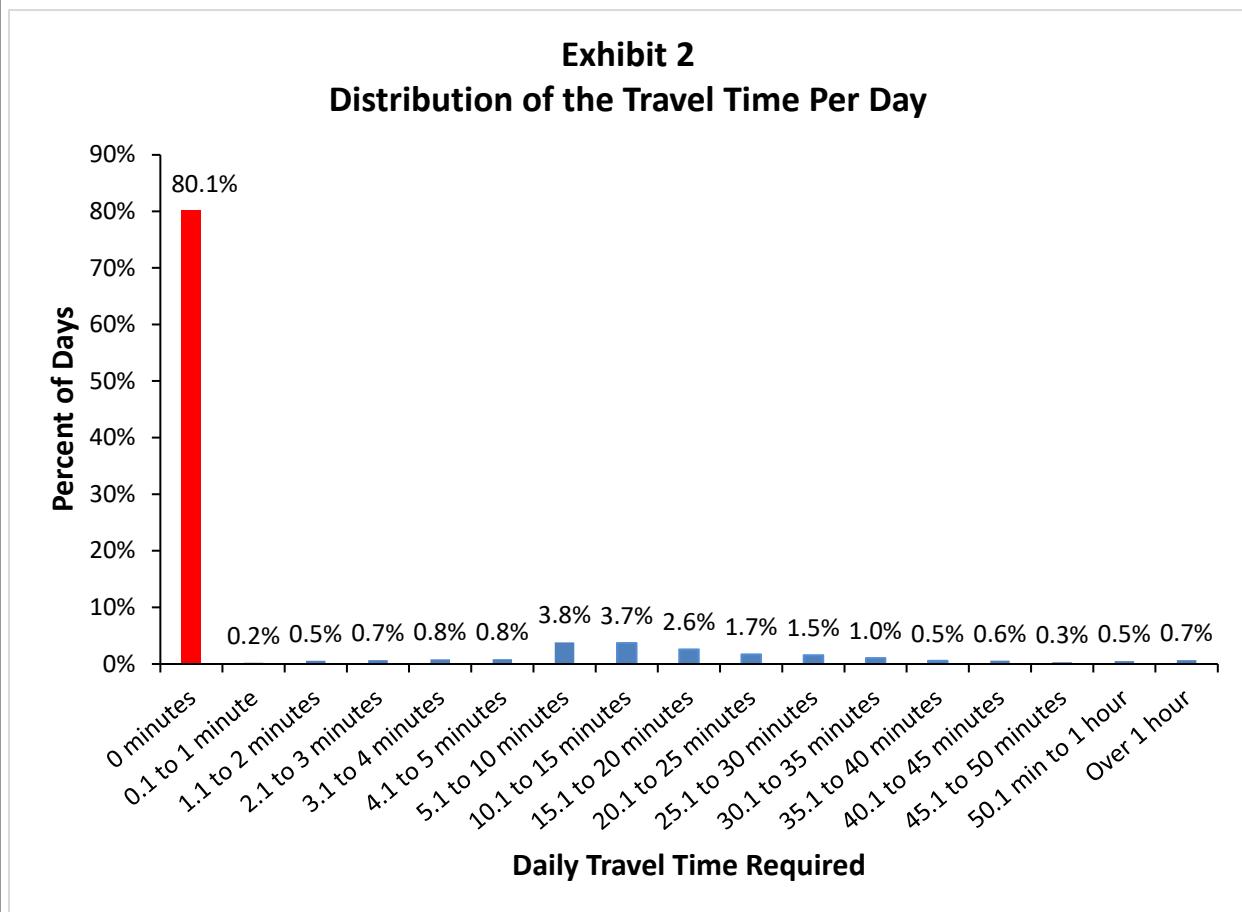

28

⁷ Some appointments are overnight assignments. Overnight assignments are assigned to the day when the appointment commenced for the purposes of this analysis.

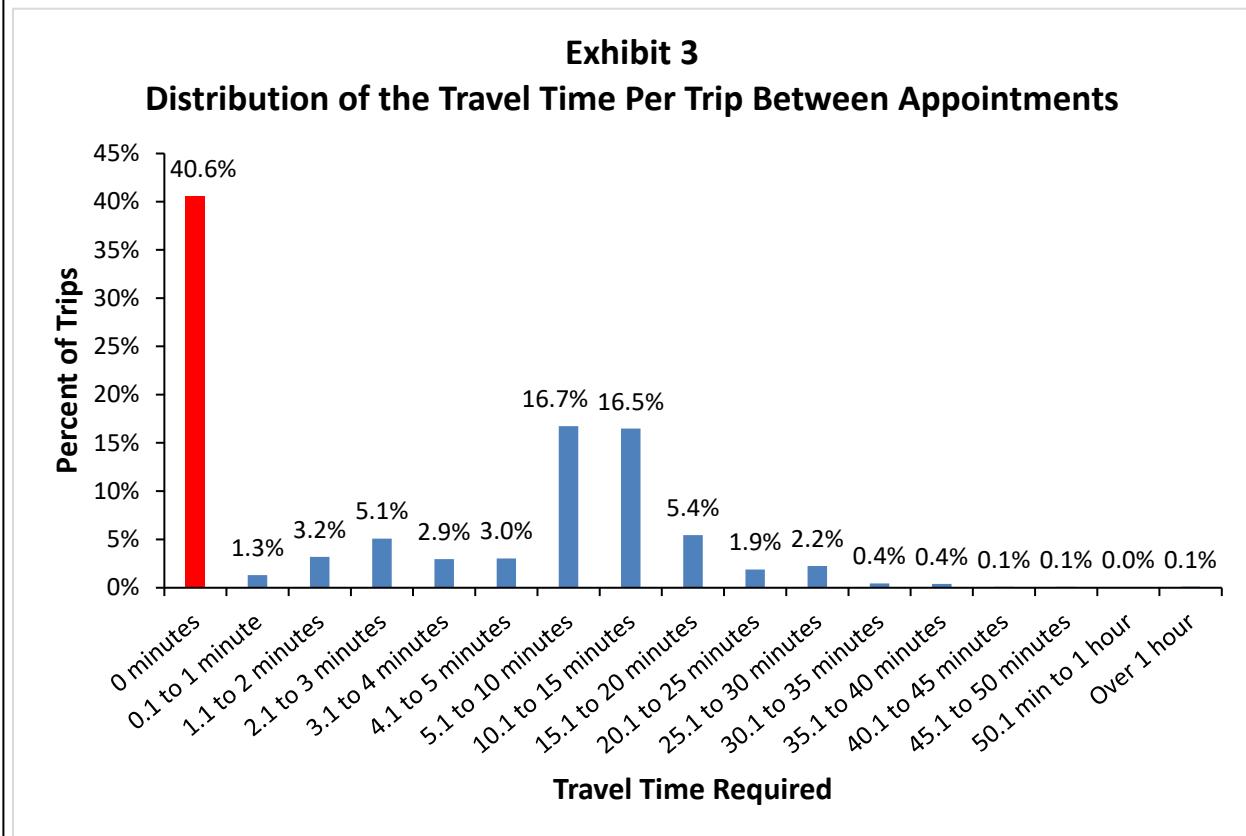

1 **B. The vast majority of days, there is no travel time required**

2 12. Exhibit 2 examines how frequently HHAs travel between patient
 3 assignments. As shown on Exhibit 2, 80.1% of days did not have any travel time required. This is
 4 because 51.0% of days are one patient days, and 29.1% of days that have multiple patient
 5 appointments have appointments that are in the same location. Further, 6.8% of days had between
 6 1 and 10 minutes of travel time, which may be below the Court's threshold for *de minimis* time,
 7 6.3% of days had between 10.1 and 20 minutes of travel time, and only 6.8% of days had more
 8 than 20 minutes of travel time. Generally, these findings imply that extended travel time was not
 9 a frequent occurrence.

1 C. The timekeeping data shows that travel time between appointments is 10
 2 minutes or less on 72.8% of trips and 15 minutes or less on 89.3% of trips

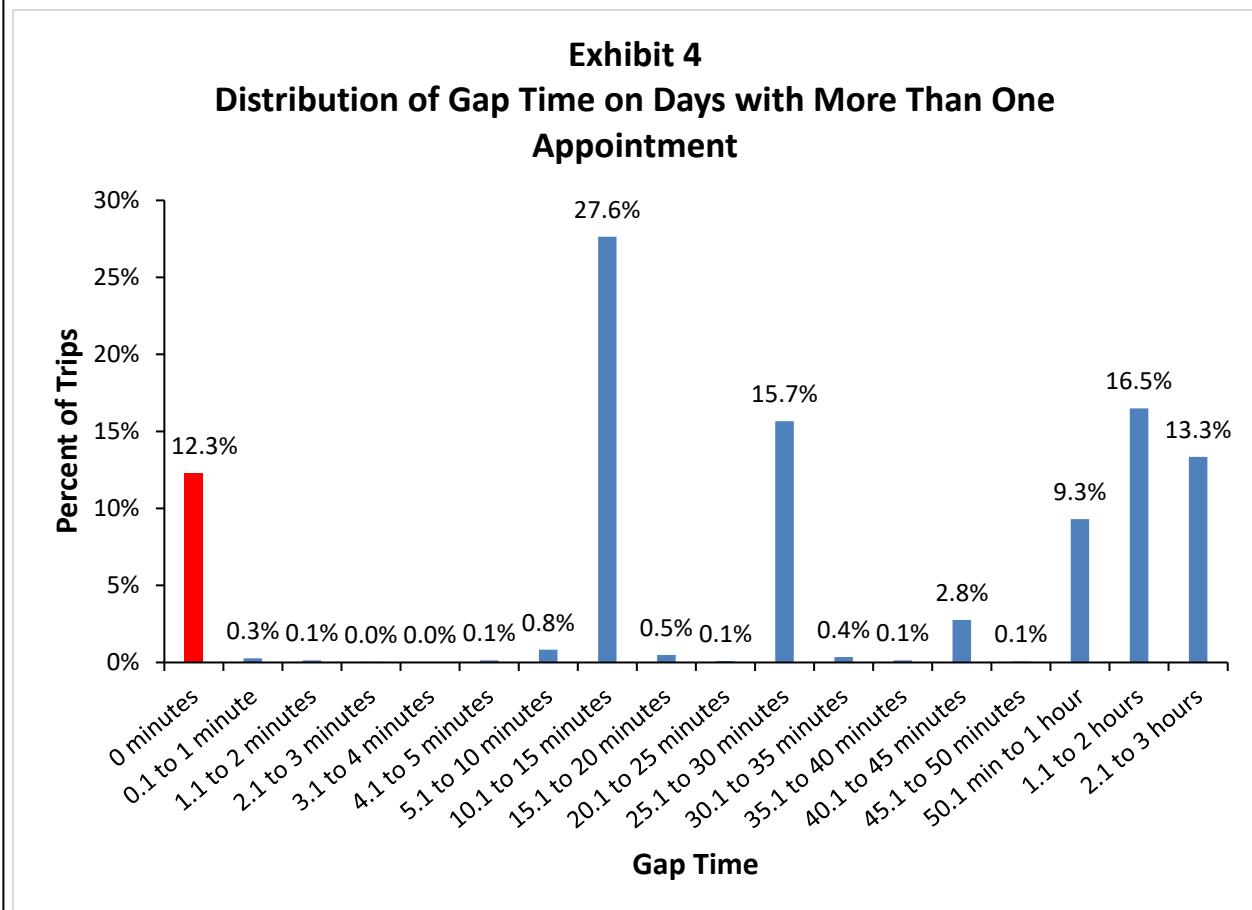

3 13. Exhibit 3 presents an analysis of travel time at the trip level, from
 4 appointment 1 to appointment 2, as opposed to day level shown on Exhibit 2. Again, the time
 5 estimates are based on Google Maps' estimate of travel time. As shown on Exhibit 3, 40.6% of
 6 trips between patient appointments require no travel at all because the patients are in the same
 7 building.⁸ Another 4.5% of trips between patient appointments are within walking distance,
 8 denoted here as a 0.1-2-minute trip, and 11.0% are of trips are between 2 and 5 minutes. Finally,
 9 16.7% of trips are between patients that are within a 5–10-minute drive of one another. In other
 10 words, the travel time between appointments is 10 minutes or less 72.8% of the time. Also, 89.3%
 11 of trips are 15 minutes or less. Thus, generally the appointments are relatively close together in
 12 terms of geographic proximity.

28 ⁸ The reason why 29.1% of days have no travel between appointments and 40.6% of trips have no travel is that the denominator for trips is smaller than the denominator of days.

1 **D. Analysis of total gap time per day shows that much of the gap time at issue**
 2 **can fall into extended periods beyond 20 minutes**

3 14. Exhibit 4 below presents an analysis of total gap time between appointments
 4 per day. In considering gap time, it is important to note that both the DOL's analysis and my
 5 analysis drop gap time of greater than 20 minutes as non-compensable. Exhibit 4 also shows that
 6 sometimes the gap time between appointments can be zero, which can occur if the patient
 7 appointments are scheduled back-to-back at the same location. In considering the gap time below,
 8 it is important to note that travel may occur during a portion of the gap time measured. Finally,
 9 the extended gap time on a given day is likely due to long periods of inactivity between
 10 appointments.

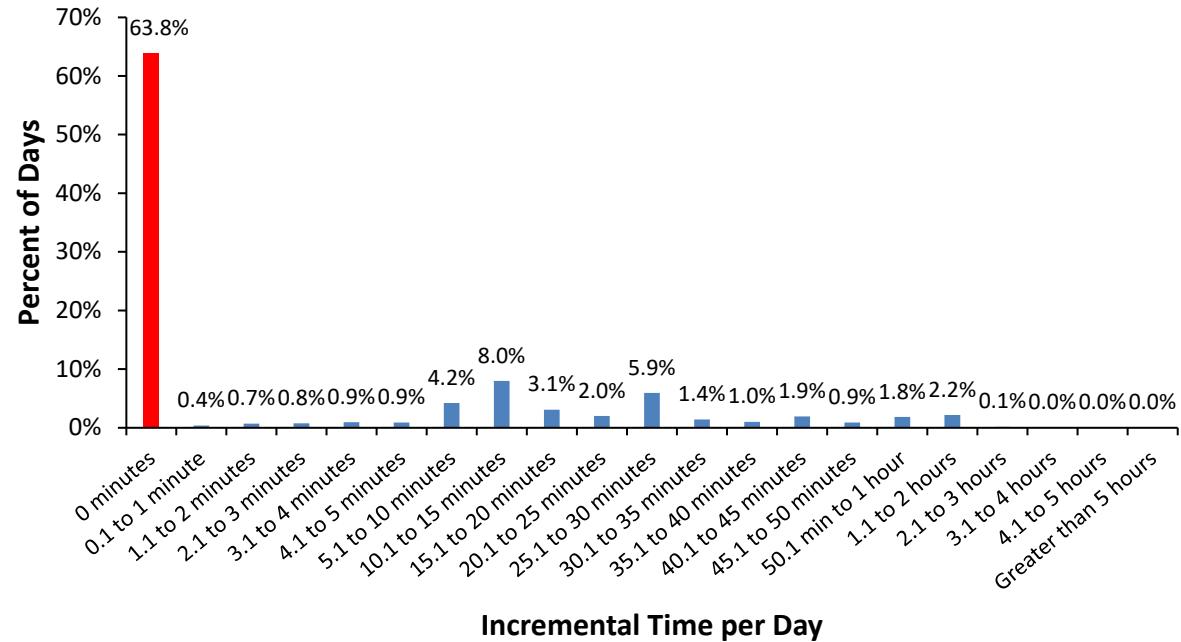

E. Analysis of incremental time per day shows that 63.8% of days have no incremental time and 71.7% of days have no incremental time after accounting for potentially *de minimis* time

4 15. Exhibit 5 below presents an analysis of total incremental time per day which
5 combines any gap time of 20 minutes or less after accounting for travel time and the estimated
6 travel time from Google Maps. For example, suppose that an appointment ended at 12:00 PM and
7 the next appointment started at 12:30 PM. If the travel time was 8 minutes, then the 8 minutes of
8 travel time would be included in the analysis, but the 22 minutes of gap time would be excluded.
9 Alternatively, if the travel time was 15 minutes and the gap time was also 15 minutes, then the
10 full 30 minutes would be included in the analysis. As shown on Exhibit 5, 8.0% of days had total
11 incremental time of 10 to 15 minutes. Further, 7.9% of days had total incremental time of less
12 than 10 minutes, where the *de minimis* rule may apply and 63.8% of days have zero incremental
13 time.

Exhibit 5

Total Incremental Time per Day Combining Gaps of 20 Minutes or Less and Travel Time

1 **VI. ESTIMATES OF POTENTIAL UNPAID WAGES**

2 16. It is my understanding that one potential interpretation of this audit is that
 3 when time between appointments is 20 minutes or less, that time is compensable and should be
 4 included in time worked for minimum wage purposes.^{9,10} To evaluate this potential theory, the
 5 timekeeping data was analyzed to determine each shift where the HHA had more than one patient
 6 appointment during a workday. For example, suppose the HHA was scheduled for an appointment
 7 from 10:00 AM to 11:45 AM and from 12:00 PM to 1:30 PM. Under this approach, if the 15
 8 minutes between 11:45 and noon was not paid, then the 15 minutes between appointments would
 9 represent time worked for compensation purposes and unpaid wages if not already paid.
 10 Conversely, if the gap between appointments is 20 minutes or greater, then the gap time may not
 11 be compensable because the employee may be on unpaid meal break or rest break. Thus, if the
 12 fact pattern were that appointment 1 ended at 11:30 AM and appointment 2 commenced at 12:00
 13 PM, then no additional time is owed because the 30-minute gap between appointments is greater
 14 than 20 minutes. Exhibit 6 presents estimates of unpaid “gap” time under the theory that any gap
 15 time 20 minutes or less are compensable. While no travel time is explicitly included in this
 16 analysis, any travel time of 20 minutes or less would be accounted for. Potential unpaid wages are
 17 calculated under the theory that unpaid wages should be paid at minimum wage and unpaid
 18 overtime premiums (0.5) would be paid out at the weighted average of the minimum wage and
 19 base rate.^{11,12}

20

21 ⁹ Per DOL Fact Sheet #22 – Hours Worked Under the Fair Labor Standards Act - Rest periods of short
 22 duration, usually 20 minutes or less, are common in industry (and promote the efficiency of the employee) and are
 23 customarily paid for as working time. These short periods must be counted as hours worked. Unauthorized
 24 extensions of authorized work breaks need not be counted as hours worked when the employer has expressly and
 25 unambiguously communicated to the employee that the authorized break may only last for a specific length of time,
 26 that any extension of the break is contrary to the employer's rules, and any extension of the break will be punished.
 27 Bona fide meal periods (typically 30 minutes or more) generally need not be compensated as work time. The
 28 employee must be completely relieved from duty for the purpose of eating regular meals. The employee is not
 relieved if he/she is required to perform any duties, whether active or inactive, while eating.
<https://www.dol.gov/agencies/whd/fact-sheets/22-flsa-hours-worked>.

10 In considering the pay audit discussed below, it is important to note that while the DOL contends that employees
 11 were not paid for all time worked, all but one employee studied were paid at least minimum wage for all hours
 12 worked, after accounting for any gaps 20 minutes or less and all travel time.

11 The attachment labeled Exhibit 11 presents an employee-by employee assessment of potential unpaid wages under
 12 each approach presented herein.

12 The following analyses of potential unpaid wages are limited to the employees identified in the DOL's analysis of
 13 unpaid Break and Travel time who are not also listed on the “deminimus-no name” worksheet (See “DOL 185277-

Exhibit 6

Description	Estimated Wages for Hours Less than 40	Estimated Overtime for Hours Greater Than 40	Total Regular and Overtime Wages
Any gaps 20 minutes or less are compensable time	\$39,727	\$880,771	\$920,498

17. As noted above, sometimes during the gap between appointments there is travel time from one location to the next. For example, the data may show that appointment 1 was at 10:00 AM to 11:00 AM, appointment 2 was at 11:45 AM to 12:45 PM, with 5 minutes of travel, which translates to 40 minutes of down time and 5 minutes of drive time between appointments. Alternatively, suppose appointment 1 ended at 11:00 AM and appointment 2 started at 11:45 and there was 20 minutes of travel time. The fact set translates into 25 minutes of downtime and 20 minutes of travel time.

18. Sometimes the total incremental time is 10 minutes or less, which may be below what the Court considers to be its threshold for *de minimis* time. Thus, for purpose of this analysis, shifts where incremental gap plus travel time is 10 minutes or less per shift are excluded. In other words, any gap time of 20 minutes or less and travel time is included in incremental time, but if the total incremental time is 10 minutes or less, then the workday is not included in the unpaid wages analysis. Unpaid wages for non-working gap and travel time are calculated at minimum wage and any unpaid overtime premiums (0.5) would be paid out at the weighted

C.xlsx"). After a manual name match, each of the 799 employees with break and/or travel time were identified in the time and pay records.

1 average of the minimum wage and base rate. Exhibit 7 below presents analysis of potential unpaid
 2 wages and overtime under this methodology.

3 **Exhibit 7**

Description	Estimated Wages for Hours Less than 40	Estimated Overtime for Hours Greater Than 40	Total Regular and Overtime Wages
Any gaps of 20 minutes or less plus travel time are included in incremental time. All days with incremental time 10 minutes or less are excluded.	\$71,066	\$1,559,329	\$1,630,395

11 19. It is my understanding that commute time is not considered compensable.
 12 Analysis of the data indicates that HHA's scheduled for more than one appointment sometimes
 13 have the appointments so spread out that Prestige contends that the commute doctrine applies to
 14 travel time on split shifts where appointments are several hours apart. In practical terms, what
 15 this assumption implies is that the travel segment between appointment 1 and appointment 2 is
 16 excluded if the gap time between the two appointments is long enough to constitute a split shift.
 17 Exhibit 8 below presents the results of analyses that examine split shifts under two different
 18 scenarios for what constitutes a split shift. The first scenario assumes that a gap of 2 hours
 19 constitutes a split shift and the second scenario assumes that a gap of 3 hours constitutes a split
 20 shift.
 21
 22
 23
 24
 25
 26
 27
 28

Exhibit 8

Description	Estimated Wages for Hours Less than 40	Estimated Overtime for Hours Greater Than 40	Total Regular and Overtime Wages
<u>Scenario 1:</u> Gap time of 20 minutes or less plus travel time is included in incremental time. All days with incremental time more than 10 minutes are included. Split shift adjustment is made for gaps greater than 2 hours	\$62,080	\$1,406,894	\$1,468,974
<u>Scenario 2:</u> Gap time of 20 minutes or less plus travel time is included in incremental time. All days with incremental time more than 10 minutes are included. Split shift adjustment is made for gaps greater than 3 hours	\$69,033	\$1,527,033	\$1,596,066

20. To provide an example of how potential damages are assessed, Exhibit 9 below shows the trips required in a hypothetical work week. The HHA works for 40 hours at \$9/hour. They have 20 different breaks scheduled throughout the week, all of which require travel between two different patient locations. Each of these breaks/gaps in work are shown below, with the corresponding addresses of each patient visit before and after the break.

Exhibit 9

Date	Break Time (in Hours)	Estimated Travel Time from Google Maps (in Hours)	Estimated Travel Time from Google Maps (in Minutes)	DOL Assumed Unpaid Time (in Hours)	DOL Assumed Unpaid Time (in Minutes)

12	07/02/2017	0.5	0.0542	3	0.25	15
13	07/02/2017	2	0.0542	3	0.25	15

21. As shown, each of these breaks are 30 minutes or longer, with 3 minutes of travel required. The DOL's calculations assume 15 minutes of travel for each trip between two different patient locations, for a total of 5 unpaid break hours (20 trips x 15 minutes). The employee has already worked 40 hours this week, so the 5 hours are paid at time and half assuming an \$11/hour rate. This results in:

- $\$11 * 1.5 = \$16.50 \rightarrow \$16.50 * 5 \text{ hours} = \82.50 in estimated back pay

Using the actual hourly rate of \$9, paying back the actual travel time of 1 hour (20 trips x 3 minutes) at minimum wage results in a much lower unpaid wages amount compared to the DOL's estimate. The blended rate overtime calculation methodology is as follows:

- Straight Time Owed: $\$7.25 * 1 \text{ hour} = \7.25
- Resulting Regular Rate: $(\$9 * 40 \text{ hours} + \$7.25 * 1 \text{ hour}) / 41 \text{ hours} = \8.957
- Premiums Owed: $\$8.957 * 0.5 * 1 \text{ hour} = \4.48

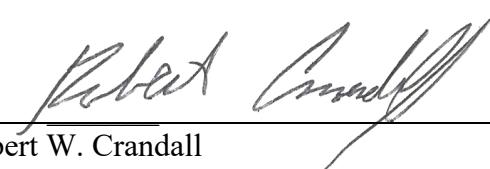

1 Total estimated back pay is \$11.73. The DOL's methodology results in an overstatement of unpaid
 2 wages for this work week of \$70.77.

3
 4 22. Finally, as noted above, the DOL's methodology is to calculate unpaid
 5 wages for non-working time based on the theory that 15 minutes travel between appointments and
 6 gaps of 20 minutes or less are compensable. However, the DOL calculates unpaid wages for non-
 7 working time based on a base rate of \$11 per hour and an overtime rate of \$16.50 per hour. Exhibit
 8 recomputes the DOL's calculation using minimum wage for non-working regular hours and the
 9 weighted average regular rate for overtime purposes.

10
 11 **Exhibit 10**

Description	Estimated Wages for Hours Less than 40	Estimated Overtime for Hours Greater Than 40	Total Regular and Overtime Wages
Gap time of 20 minutes or less plus travel time of 15 minutes per instance is included in incremental time.	\$70,120	\$1,686,685	\$1,756,806

18

ROBERT W. CRANDALL, PARTNER

Robert W. Crandall is a Partner in the litigation consulting practice of Resolution Economics LLC. He has a M.B.A. from Loyola Marymount University and a B.A. in History from the University of Southern California. Prior to the formation of Resolution Economics, Mr. Crandall was with the Dispute Consulting Group at Deloitte & Touche, the Economics & Litigation Services Group at Altschuler, Melvoin & Glasser, and the Dispute Analysis & Corporate Recovery Group at Price Waterhouse.

Mr. Crandall provides consulting services and expert witness testimony related to a variety of practice areas. He has provided expert testimony in deposition, trial, arbitration, and other forums. He specializes in estimating damages, evaluating business issues and business operations, designing and conducting observation studies and surveys related to work activities, assessing economic and statistical approaches to litigation issues, and performing forensic programming and analysis of large complex databases. Mr. Crandall has significant experience in analyzing complex data for the purpose of assisting counsel in evaluating class certification and liability. He is frequently asked to present findings related to class certification, merits, and economic exposure for alternative dispute resolution forums such as mediation, settlement conferences, and arbitration.

Professional Experience

Mr. Crandall has considerable experience in providing economic and/or statistical analyses related to employment litigation matters. Also, he performs general damages analysis, forensic accounting, business valuations, and statistical analysis in a broad range of matters where the underlying issues are: breach of contract, antitrust, intellectual property, environmental claims, and insurance coverage. In addition, Mr. Crandall has considerable expertise in financial modeling, creating large databases from paper records and diverse data sources, designing, implementing, and analyzing surveys, and conducting statistical analysis related to complex data intensive litigation assignments. Finally, Mr. Crandall is experienced in analyzing job duties and content and business operations.

Employment Discrimination Liability Analysis

Mr. Crandall has performed numerous statistical analyses of liability related to class action, multi-plaintiff, and single plaintiff claims of employment discrimination. He is experienced at analyzing claims alleging discrimination in hiring, promotion, placement, termination, discipline, and pay equity. Assignments representative of Mr. Crandall's experience in employment discrimination include the following:

- Provided consulting services to defense counsel in a class action matter alleging racial discrimination in the officer disciplinary process at a very large police department. Services included statistical analysis of data to test plaintiffs' allegations and work related to rebutting analysis proffered by plaintiffs' expert.

- Provided consulting services to defense counsel in a class action matter, brought by the EEOC, alleging discrimination in recruiting, hiring and placement at a hotel. Created an applicant database, and performed SAS programming and statistical analysis related all three issues. Analyzed opposing expert analysis and assisted counsel in developing cross-examination.
- Provided consulting services to defense counsel in a class-action matter brought by the EEOC alleging age discrimination in terminations at a major law firm. Services included building analytical databases from multiple sources of information, performing statistical analysis related to the discrimination claim, estimating economic exposure for mediation/ settlement discussions.
- Provided consulting services to defense counsel in multi-plaintiff action alleging age discrimination at a major clothing retailer. Services included researching external labor market characteristics for individuals with the plaintiff's occupation. Created financial models to calculate damages under a variety of offset scenarios.
- Provided consulting services to defense counsel in multi-plaintiff action alleging racial discrimination in work assignments at a government agency. Services included performing statistical analysis to determine if minority workers received a disproportionate share of unfavorable work assignments.
- Provided consulting services to defense counsel in a multi-plaintiff action alleging gender discrimination in promotions at a large city police department. Services included performing statistical analysis of promotions and placements into coveted positions.
- Provided consulting services to defense counsel in multi-plaintiff action alleging age discrimination following a reduction of force at a hospital. Services included performing statistical analysis of liability and critiquing the analyses proffered by plaintiffs' expert.
- Provided consulting services to defense counsel in a large national class action employment dispute alleging gender discrimination at a warehouse style home and garden center retailer. Performed SAS programming and statistical analyses related to hiring, initial placement, and initial pay of applicants. Performed statistical analyses of female availability in the external labor market. Provided deposition support to counsel including drafting questions for the deposition of the opposing expert witness.
- Provided consulting services to defense counsel in a class action employment matter brought by the EEOC. Constructed a damage model that placed minority applicants in jobs awarded to White employees through analysis of the difference between actual and expected hires based on various flexible assumptions. Developed a random placement model testing both minority and non-minority placements. After placing the minority applicants at an appropriate rate during the damages period, the model calculated the damages of the applicants based on the time of their placement and other labor market factors.
- Provided consulting services to defense counsel in a single plaintiff action alleging age discrimination by a large international food company. Performed SAS programming and statistical analysis of terminations. Analyzed the work product of opposing expert. Assisted in drafting questions for use at deposition.

- Provided consulting services to defense counsel in a class action matter alleging age discrimination at a major drug store chain. Performed statistical analysis related to terminations of store managers and assistant managers, reviewed and critiqued analysis of opposing experts.
- Provided consulting services to defense counsel in a single plaintiff matter alleging age discrimination in terminations resulting from a reduction in force. Services included performing statistical analysis of termination claims.
- Provided consulting services to defense counsel in a multi-plaintiff matter alleging national origin discrimination at a waste management company. Performed statistical analyses to test plaintiffs' claims. Developed external labor market benchmarks.
- Provided consulting services to outside counsel in connection to performing statistical analysis of proposed workforce reductions at a publishing company. Tested various reductions in force scenarios for statistical significance. Assisted counsel in creating a RIF plan that avoided adverse impact on protected classes.
- Provided consulting services to outside counsel in connection to performing statistical analysis of proposed workforce reductions at a medical supply manufacturing company. Tested various reductions in force scenarios for statistical significance. Assisted counsel in creating a RIF plan that avoided adverse impact on protected classes.
- Provided consulting services to defense counsel in a wrongful termination matter alleging racial discrimination at a major defense contractor. Examined workforce composition in response to allegations of systematic discrimination based on race. Analyzed external labor market availability to determine minority representation in the industry by job classification. Created a visual representation of results to be used as exhibits in trial. Calculated loss of earnings related to the termination. Drafted cross-examination questions for the examination of plaintiff's expert.

Class Action Wage and Hour Claims

Mr. Crandall has been involved in more than 500 class action wage and hour matters. He is highly experienced in analyzing liability, damages, and class-member commonality related to wage and hour claims. He is experienced in designing, implementing, and analyzing surveys and time-in-motion studies and performing forensic data analysis related to job content, exempt / non-exempt status, independent contractor / employee status, hours worked, uncompensated time, meal and rest breaks, improper pay calculations, and other issues. Finally, Mr. Crandall has significant experience in assisting counsel at mediation where he presents findings related to class certification and merits issues, evaluates economic exposure under a variety of legal theories, and assists in structuring the settlement terms. In this role, Mr. Crandall has worked for a party or as a neutral expert. Assignments representative of Mr. Crandall's wage and hour experience include:

- Provided consulting services to defense counsel in a national class-action wage and hour matter alleging that several thousand loan originators at a large banking institution were misclassified under FLSA. Conducted statistical analyses of hours worked records, compensation data, plaintiffs' declarations, and other data to determine if select groups of plaintiffs would be representative of class. Assisted counsel in developing an approach for trial, estimating economic damages, and critiquing plaintiff's trial plan and damages analyses.

- Provided consulting services and expert services to defense counsel in a class action wage and hour matter alleging several hundred insurance sales originators at a call center were misclassified as exempt workers. Services included analyzing phone system data containing over 5.5 million records and computer login / logout data containing over 250,000 records to estimate overtime hours worked each workweek and the number of missed meal and rest periods. Analyzed compensation data and estimated economic damages for the class.
- Provided consulting services to defense counsel in a wage and hour matter alleging that several hundred loan originators were misclassified as exempt workers. Services included analyzing phone system data containing over 5.3 million records and over 1 million door swipe records to estimate overtime hours worked and the number of missed meals and rest periods each workweek. Analyzed compensation data and estimated damages and penalties for the class for mediation. Also, developed an economic model that estimated exposure based on the probability and economic consequences associated with winning or losing a variety of legal rulings.
- Provided consulting services to defense counsel in a wage and hour matter alleging that several thousand General Managers and Assistant Managers at a large office supply retailer were misclassified as exempt employees. Services included designing and conducting a survey to examine whether class members were appropriately classified, analyzing the company's labor model and human resources data, and conducting statistical analysis related to a variety of class certification issues.
- Provided consulting services and expert witness testimony to defense counsel in a matter alleging hourly workers at a large chain of convenience stores were denied meal and rest periods, that all workers lost vacation pay, and that the employer placed employees on unpaid leave prior to termination to avoid waiting time penalties. Services included data and statistical analysis of over 25 million time clock records in order to examine a variety of issues related to shift duration and break opportunities, analysis of vacation data to determine the number employees impacted by the policy, and analysis of termination records to demonstrate that there was no systematic practice of placing employees on LOA status prior to termination.
- Provided consulting services to defense counsel in a wage and hours matter alleging store managers and assistant store managers at a chain of retail discount stores were misclassified. Services included creating and implementing a survey to examine whether class members were classified appropriately and conducting statistical analysis related to commonality of class-members and other class certification issues. Also, analyzed and critiqued a survey conducted by plaintiffs, assisted counsel in opposing expert depositions, and estimated economic damages for mediation.
- Provided consulting services to defense counsel in a wage and hours matter alleging store managers at a chain of convenience stores were misclassified. Services included creating and implementing a survey to examine whether class members were classified appropriately, analyzing labor models, conducting statistical analysis related to commonality of class-members, assisting counsel in estimating damages for mediation.
- Provided consulting services to defense counsel in a class-action wage and hour matter alleging uncompensated meal periods and breaks, unpaid overtime wages, and minimum wage violations at a field maintenance company. Services included creating a database of hours worked from paper and electronic records, and then providing damages estimates based on a variety of assumptions and legal theories.

- Provided consulting services to defense counsel in a multi-plaintiff wage and hour matter alleging that the defendant employer failed to compensate security guards for uniform changing time and other claims of off-the-clock work. Services included designing and conducting an observation study to measure time associated with various activities and estimating damages for mediation.
- Provided consulting services to defense counsel in a wage and hours matter alleging store managers and assistant store managers at a chain of clothing retail stores were misclassified. Services included creating and implementing a survey to examine whether class members were classified appropriately and conducting statistical analysis related to commonality of class-members and other class certification issues.
- Provided consulting services to defense counsel in a class action matter alleging a variety of wage and hour violations for hourly workers at chain of warehouse stores. Services included analyzing over 5.5 million time clock records and payroll data to evaluate allegations of improper time adjustments, missed meal and rest periods, uncompensated split shifts, reporting time violations, overtime and regular rate issues, and off-the-clock work. Also, estimated damages for mediation.
- Provided consulting services to defense counsel in a class action matter alleging a variety of wage and hour violations related to time spent donning and doffing at a food factory. Services included designing a statistical sampling approach, conducting a time and motion study to measure donning and doffing time, and estimating economic damages related to various claims.
- Provided consulting services to defense counsel in a class action wage and hour matter alleging meal and rest period violations for hourly workers at chain of disabled adult services centers. Services included designing and conducting an observation study to estimate breaks taken and break opportunities. Also, assisted counsel in examining class certification issues and the representativeness of the name plaintiffs' claims.
- Provided consulting services to defense counsel in a national class action wage and hour matter alleging off-the-clock work at a storage company. Services included analyzing company hours data to test plaintiffs' legal theory, reviewing, analyzing, and critiquing a survey conducted by plaintiffs, conducting statistical analyses related to class certification, designing a survey related to management and timekeeping practices, and estimating economic damages for mediation.
- Provided consulting services to defense counsel in a class action wage and hour matter alleging that several hundred managers were misclassified as exempt workers by a large restaurant chain. Analyzed data and assisted counsel in developing approaches to class certification.
- Provided consulting services to defense counsel in a wage and hour class action matter alleging that the defendant grocery store chain misclassified several hundred non-exempt assistant managers as exempt workers. Services included creating database of hours worked, designing a flexible financial model, and computing damages under a variety of counsel specified scenarios for the purposes of mediation.

- Provided consulting services to defense counsel in several wage and hour matters alleging that police officers should be compensated for donning and doffing and other tasks. Services included analyzing survey data and time clock data to determine class certification issues for other off-the-clock tasks and constructed measures of donning and doffing time.
- Provided consulting services to defense counsel in a class action matter alleging failure to pay overtime wages to independent sales and service representatives for a large national tool franchiser. Services included designing and implementing an hours survey to determine whether the additional hours worked claimed by some plaintiffs was representative of the additional hours worked by the class as a whole. Determined that the problem were isolated to certain geographic areas rather than nationwide.
- Provided consulting services to defense counsel in a matter alleging that a class of several hundred independent contractors were misclassified employees. Services included designing a sampling scheme, building and analyzing a database of business expenses, analyzing the business model, and performing business valuations related to a number of businesses.
- Provided consulting services and expert witness testimony to defense counsel in a NLRB matter alleging that independent contractors package delivery drivers were misclassified employees. Services included analyzing the business model, productivity data, and other business records, and performing business valuations related to several businesses.
- Provided consulting services to defense counsel in a class action matter alleging that independent contractors and their employees/ workers were misclassified employees of the defendant and a large national hardware chain. Services included analysis of the business model to evaluate whether the business model meets the criteria for a business.
- Provided consulting services to defense counsel in a multi-district class action matter alleging that independent contractors in the package delivery business were misclassified employees. Services included analyzing the business model, conducting a variety of surveys, and responding to the class certification report of plaintiffs' expert.
- Provided consulting services to defense counsel in a matter alleging uncompensated time for donning and doffing at a chain of quick oil lube establishments. Services included designing and conducting a time and motion study to estimate total time spent donning and doffing and designing a survey to determine uniform practices to assess class certification and de minimis issues.
- Provided consulting services to defense counsel in a class action matter alleging that product marketing testers performed off-the-clock work and were denied meals and rest periods. Services included designing and conducting an online survey to evaluate commonality issues.

Employment Damages Analysis

Mr. Crandall has assisted counsel in estimating employment related economic damages in more than 100 cases. He has expertise in evaluating but-for earnings, job search efforts, mitigation opportunities, and losses related to stock options and other forms of equity. Assignments representative of Mr. Crandall's experience estimating economic damages include the following:

- Provided consulting services to defense counsel in numerous matters alleging to wrongful termination of police officers, failure to promote police officers, and failure to hire police officers from a variety of police agencies. Services included analyzing labor market opportunities for police officers and creating economic models to estimate economic damages under a variety of career paths and/or retirement scenarios and critiquing the analyses of opposing experts.
- Provided consulting services to defense counsel in numerous matters alleging wrongful termination, or failure to promote government employees at a variety of city level agencies. Services included creating economic models to estimate damages under a variety of career paths and retirement scenarios.
- Provided consulting services to defense counsel in numerous matters alleging wrongful termination in the grocery industry. Services included creating models to estimate economic damages, analyzing mitigation opportunities, and critiquing the work of opposing experts.
- Provided consulting services to defense counsel in numerous matters alleging wrongful termination in the retail industry. Services included creating models to estimate economic damages, analyzing mitigation opportunities, and critiquing the work of opposing experts.
- Provided consulting services to defense counsel where the underlying issue was a class action failure to hire complaint brought by the EEOC. Services included creating financial models for estimating damages for the ten named plaintiffs, as well as, estimating potential damages for the class.
- Provided consulting services to defense counsel in a breach of contract matter where the underlying issue was related to an alleged failure to deliver stock options to an executive in the high-tech industry. Analyzed options value under a variety of trading strategies.
- Provided consulting services to plaintiff counsel in a National Labor Relations Act right to work case. Services included calculating the economic losses suffered by twenty-five plaintiffs due to alleged illegal acts by their union.
- Provided consulting services to defense counsel in a multi-plaintiff action alleging wrongful terminations by an aerospace and defense contractor. Evaluated plaintiff's expert report, and developed cross-examination questions for deposition and trial. Also, provided a rebuttal analysis of economic damages.
- Provided consulting services to plaintiff's counsel in a matter alleging wrongful termination and breach of contract for a high-ranking executive at a health care company. Evaluated labor market earnings potential, calculated economic damages, reviewed defendant's expert analyses, and drafted a report of findings and a rebuttal report.

- Provided consulting services to plaintiff's counsel in a matter alleging wrongful termination and breach of contract for a highly compensated sales employee in the high-tech industry. Evaluated labor market earnings potential, calculated economic damages, created exhibits for use at mediation, and created trial exhibits.
- Provided consulting services to defense counsel in a wrongful termination matter that alleged discrimination based on national origin brought by a former project manager at a large engineering corporation. Analyzed mitigation factors and calculated loss of earnings.

Insurance Coverage/Environment/Statistics

Assignments representative of Mr. Crandall's experience in related to insurance converge, environmental claims, and other statistical matters include:

- Provided consulting services to defense counsel in connection with a Department of Justice investigation regarding allegations of racial profiling by a large city police department. Analyzed departmental data related to over 130,000 traffic stops, pedestrian stops, and other types of police contacts that occurred in four selected weeks in 1997 and four selected weeks in 1999. Cross-referenced traffic stops data with other departmental information sources including human resources data, precinct level paper records, and the officer discipline system to test various hypotheses.
- Provided consulting services to defense counsel in a 17200 action alleging that the defendant insurer was using inappropriate condition adjustments when settling vehicle total loss claims. Services included analyzing theoretical issues related to used car pricing, conducting regression analysis to estimate coefficients for various condition adjustments, and determining the fairness of the settlements amounts for the name plaintiffs vehicles.
- Provided consulting services to coverage counsel in a CERCLA cost recovery action. Created a database of costs relating to the clean-up of several sites once used by an aerospace and defense contractor. Performed analysis to apportion clean up costs between covered and not covered.
- Provided consulting services supporting coverage counsel in a binding arbitration where the underlying issue was coverage for thousands of asbestos claims. Performed SAS programming, statistical analysis, created summary exhibits, and drafted a report of findings.
- Provided consulting services to coverage counsel in a class action matter alleging overcharging in workman's compensation insurance. Analyzed the difference in aggregate premium paid and the economic impact of reclassifying certain medical and legal costs.
- Provided consulting services to coverage counsel for an underlying class action case alleging damages from exposure to asbestos. Analyzed through SAS programming defense and settlement costs for over 100,000 claims. Constructed a model to apportion costs between various insurers and covered and not covered claims.

- Provided consulting services to defense counsel in a class action ADA matter brought against a government transit agency. Created databases from hard copy paper records, analyzed internal agency data, and merged all data to develop a comprehensive database of access failures. Assisted in the design of a statistical sampling scheme for future monitoring of access to the disabled.

Forensic Accounting/Business Valuations/Commercial Damages

Assignments representative of Mr. Crandall's experience related to general damages analysis, forensic accounting, finance, and antitrust include:

- Provided consulting services and expert witness testimony to defense counsel in a breach of contract matter. Services included analyzing financial records, estimating damages, and performing a valuation analysis of the plaintiff's business.
- Provided consulting services to defense counsel in a breach of contract matter where the underlying issue was fraudulent inducement of employment. Services included analyzing financial records to determine the value of shareholder equity at various points in time, creating financial models related to economic losses, analysis of financial performance of an unrelated third party to assess but-for opportunity.
- Provided consulting services to plaintiffs' counsel in class-action matter where the underlying issue was fraudulent overcharges of California consumers. Services included estimating the range of potential damages under a variety of scenarios. Filed declaration.
- Provided consulting services to plaintiff's counsel in lender liability arbitration involving a complex financial transaction. Created a financial model that demonstrated the feasibility of the transaction under various interest rate and market return scenarios.
- Provided consulting services to defense counsel in a class action matter alleging unfair business practices related to gift certificate redemptions at a major national retailer. Services included creating survey to determine redemption patterns and analysis of company data.
- Provided consulting services to plaintiff's counsel in a breach of contract matter related to the testing of an innovative dental implant product. Analyzed plaintiff's sales, products, marketing, and sales of plaintiff's competitors, analyzed the products, marketing, and sales of potential market entrants, and developed damages analyses based on a market share approach.
- Provided consulting services to defense counsel in a case alleging usury and fraud. Analyzed accounting records and other data, determined the appropriate interest charges, and quantified overcharge.
- Provided consulting services to plaintiffs and cross-defense counsel in a tort matter alleging interference with recruiting for high-tech salespeople. Analyzed labor markets and internal recruiting data, and developed damages theory and analyses related to the expected economic return on investments in human capital. Drafted declaration and provided deposition and strategy support.

- Provided consulting services to plaintiff's counsel in a breach of contract matter related to financing sub-prime equipment leases. Reviewed financial records of plaintiff's business, industry data, and cohort data, and developed a financial model projecting lost profits under a variety of default scenarios.
- Provided consulting services to defense counsel in an antitrust matter alleging anti-competitive behavior in large-scale model industry. Performed forensic accounting involving the reconstruction of sales and purchases of a multi-million dollar closely held-entity. Managed process of converting numerous paper records into computerized format and developed database to analyze sales, purchases, and gross profit margins through SAS programming. Performed accounting to determine if the plaintiff was committing fraudulent practices. Provided deposition support including drafting questions for counsel in the depositions of several fact and expert witnesses.
- Provided consulting services to plaintiff's counsel in a breach of contract matter involving a medical device. Performed SAS programming to create a database of sales and customers. Researched the market for the product in question and developed a damages model based on a market share approach.
- Provided consulting services to defense counsel in a medical malpractice action where the underlying damages issue was valuing an income stream from a closely held cash business. Performed accounting of plaintiff's financial records to determine existence and extent of fraud. Created financial models to calculate damages under a variety of scenarios.

Intellectual Property

Assignments representative of Mr. Crandall's experience related to intellectual property, trademark, and trade dress disputes include:

- Provided consulting services to plaintiff's counsel in a patent infringement action against a bedding manufacturer. Created database of sales of the patented product by the defendant and plaintiff. Analyzed price erosion caused by the sales of the competing product to the plaintiff's customers and the consequential damages resulting from the diminution of margins.
- Consulting to plaintiff's counsel in a trademark infringement action. Converted paper records to computerized format and created a database of sales attributed to the trademarked product. Analyzed data to calculate profits and consequential damages.
- Provided consulting services to defense counsel in a patent infringement action involving a high-end coffee cup manufacturer. Analyzed sales data and assisted counsel in determining an appropriate amount for settlement.
- Provided consulting services to defense counsel in a trademark infringement/breach of contract matter. Services included valuing the future income generated through use of the trademark and developing financial models and analyses of damages related to a breach of contract cross-complaint related to potential products that exploited the trademark.

- Provided consulting services to claimant's counsel in a matter alleging patent infringement, trademark infringement, and breach of contract claim involving a food additive. Services included evaluating the market potential for the product and estimating economic damages.
